

**Easy Time Clock
Biometric Fingerprint or Card Reader
US100C**

The **Easy Time Clock US100C** is a standalone wall mount time & attendance clock that will interface directly into the Easy Time Clock program through an Internet connection. The stand alone time clock does not require being plugged into a computer since it has Ethernet 10/100M, WIFI, and GPRS connection capability built directly into the unit. No software to download or maintain. The US100C has unparalleled performance, ease-of-use, precision and fast matching speed.

The stand alone time clock can use a fingerprint and/or proximity card reader to register clock in and clock out activity. It automatically transfer the clock in and/or clock out time stamp directly into the Easy Time Clock program without having to go to a computer to login into the time card to clock in or out. All reports and time card information is available in real-time online from your secure login account. Collecting time & attendance is faster, easier and accurate.
