

Easy Time Clock's US10C

The stand-alone time clock can use a fingerprint and/or proximity card reader to register clock in and clock out activity. Via its connection to the internet, the US10C sends all punches directly to Easy Time Clock so there is no need for employee's to use a computer.

All reports and time card information is available in real-time online from your secure login account. Collecting time & attendance is faster, easier and accurate.

US10C

The **Easy Time Clock US10C** is a standalone time & attendance clock that will interface directly into the Easy Time Clock program through an Internet connection. The stand-alone time clock does not require being plugged into a computer since it has Ethernet 10/100M, and Wi-Fi connection capability built directly into the unit. No software to download or maintain. The US10C has unparalleled performance, ease-of-use, precision and fast matching speed.

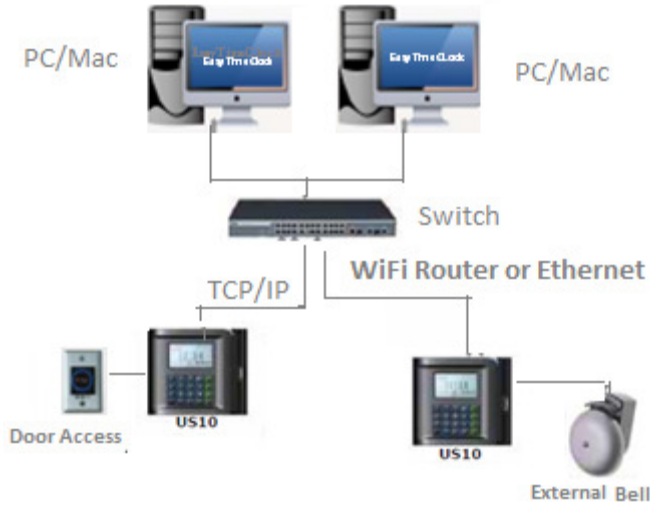

US10C Features

- Fingerprint based Time and Attendance Reader with state of the art technology and modern design
- Ethernet 10/100M and internal WiFi offer customers more choices for communication with the reader.
- Large memory stores much more data and records
- Easy operation with Push Button Keypad Technology.
- Rugged ZK Optical Sensor without coating
- 1-touch, 1-second user recognition
- Optional integrated Prox/HID or Mifare reader
- Multi Language Support
- Bell scheduling option
- Audio-Visual indications for acceptance and rejection of valid/invalid fingers
- US10 standard Ethernet connection. Wi-Fi units are sold separately.
